

Another accolade for Orbit

November 2010

The 2010 e-Excellence Survey results were recently published, and we're pleased to announce that our Orbit Benefits Technology has been awarded top rating of 'triple-e' in the Employee Benefits Platform category.

This survey is conducted by Finance & Technology Research Centre in association with Corporate Adviser Magazine and looks in great detail at employee benefits technology platforms, covering 21 different areas of each proposition. It's the most exhaustive study of employee benefits technology in the UK, so we're therefore very proud to be awarded the highest rating.
